1 A greenish-yellow non-metallic substance, found abundantly in volcanic regions, and occurring free in nature as a brittle crystalline solid, and widely distributed in combination with metals and other substances. In popular and commercial language it is otherwise known as BRIMSTONE (See also SULPHUR VIVUM) In *Chemistry*, one of the non-metallic elements atomic weight 32, symbol S.

Sulphur exists in two distinct crystalline forms and in an amorphous form. It is manufactured largely from native sulphides of copper and iron, when refined and cast into moulds, it is the *roll* or *stick* sulphur of commerce. It is highly inflammable, and is used in the manufacture of matches, gunpowder, and sulphuric acid, for vulcanizing rubber, in bleaching, and as a disinfectant.

In popular belief sulphur has been associated with the fires of hell, with devils, and with thunder and lightning.

I. 1. The brightest (as seen from the earth) of the heavenly bodies, the luminary or orb of day; the central body of the solar system, around which the earth and other planets revolve, being kept in their orbits by its attraction and supplied with light and heat by its radiation; in the Ptolemaic system reckoned as a planet, in modern astronomy as one of the stars

The ordinary language as to the sun's course, its rising and setting, etc., is based upon the old view of the sun as a body moving through the zodiac, rising above, passing across the heavens, and sinking below the horizon, etc.

Super (s'ŭp'ri, -ri), *prefix*, repr. L. *super* = the adv. and prep. *super* above, on the top (of), beyond, besides, in addition, used in composition with the various meanings detailed below. (Cf. the related Skr. *upari-*, Gr. *ὑπερ* -HYPER-, OE. *ofer*, etc. OVER-.)

A certain number of important Latin compounds, chiefly verbs, belong to the classical period, but the great majority are of later date, and many are recorded first from Christian writers. As a living prefix in English, *super-* first appears about the middle of the 15th c.; it became frequent in Elizabethan times, and in the 17th c. it was very widely used. In more recent times it has been extensively introduced into the nomenclature of chemistry and other sciences as a correlative to *SUB-*. In technical language it sometimes varies with *SUPRA-* (of which the strict correlative is *INFRA-*), e.g. *super-local* and *supra-local*, *super-orbital* and *supra-orbital*, *superlapsarian* and *supralapsarian*.

The more important and permanent compounds are entered in this Dictionary as main words; the present article includes such compounds of a general character as have not a permanent status, and scientific terms of which the meaning may (for the most part) be gathered from the meaning of the prefix and that of the radical element.

A considerable number of Latin compounds were adopted in 'learned' form in OF, as *superabonder*, *supereminet*, *supererogation*, *superflu*, *superintendunt*, *superinscription*, *superseuer*; a few of such compounds became permanently established, as *superflua*, *superlatif*, *superstitio*, but the majority have been superseded by forms with the 'popular' representative of L. *super*, viz. *sur*, e.g. *surabonder*, *sur-eminent*, *surerogation*, *surintendunt*, cf. the parallel forms *superflu*, *surflu* in mod F.

Pronunciation. The general rule is that the first syllable of the prefix carries the secondary stress of the compound, e.g. *su per'a'd*, *su per'e-ro-ga-tion*, *su pernu-mer-a-ry*, *su per-pho-sphate*, *su per-se-quu-a-l-teral*, *su per-sub-stan-tial*. But this syllable carries the main stress where there is a contrast, implicit or explicit, with the radical element as a simple word or with some other compound of it, e.g. *su per-class*, *su per-flux*, *su per-hive*, *su per-man*, *su per-na-ture*, *su per-sail*, *su per-so-lid*, *su per-stru-cture*; the

su bordinate *comt* and the *su perordinate*. In two words and their immediate derivatives (in which the etymological meaning has been obscured), the stress is on the second syllable of the prefix, viz *superfluous*, *superlative*.

I. Over, above, at the top (of); on, upon.

1 Forming adjs. in which *super-* is prepositional relation to the sb implied in the second element, as in late L *supercaelestis* that is *super celum* above the heavens, SUPERCELESTIAL, *superterrenus* that is *super terram* above the earth, SUPERTERRENE, -TERRESTRIAL.

Supra- (sɪˈprə-), *prefix*, repr. L. *suprā* = *suprā* (related to *super* and ultimately to *sub*) *adv.* and *prep.*, above, beyond, in addition (to), before in time, occurring in a few compounds in classical and late Latin; in med. and mod. L. it is mainly restricted to technical terms. Its meanings in English are for the most part parallel to, but in much less vogue than, those of *SUPER-*; but it is more prevalent than the latter in certain uses, e.g. the scientific uses in *a* and *b*, in which it is most commonly employed as a living prefix.

The stressing is as in compounds of *SUPER-*, q.v. p. 166/3.

I. Over, above, higher than; (less commonly) on, upon: in a physical sense.

1. In prepositional relation to the *sb.* implied in, or constituting, the second element = *SUPER-* 1; as in late L. *supracaelestis* SUPRACAELESTIAL, mod. L. *supra-axillaris* (axilla AXIL), *suprafoliaceus* (foolium leaf).
